We designed our mission patch to represent four things. The first thing is the cow which represents Wisconsin. We choose the cow because Wisconsin is the Dairy State. The second thing is the 4 leaf clover which represents the 4-H program, which we are all a part of. The third things are the stars, the rocket, the earth, and the moon. These things represent space which Space Camp taught us more about. The fourth things are our team name, Aquarius, and our initials which represents our team and the people that were a part of it. While we were here we had lots of fun and learned more about teamwork, leadership, and space!
