MEMOR

The name of our group is Endeavor. One of the things we have on our patch is a Cow Constellation. We have a Cow Constellation because we are all from Wisconsin and it is the Source of the Milky Way. Our patch is circular because it represents a Cheese Circle. We have rockets to represent the rockets we made and launched. Also to tell about space camp along with the moon and stars. The people on earth are mission control people to tell about what we learn. Finally our names are all on the side to represent the people in our group and what role they had in our mission.
