

County Ratio of its Share of State Foreclosure Cases Relative to its Share of State Housing Units

County Ratio of its Share of State Foreclosure Cases Relative to its Share of State Housing Units (2007 & 2008) ¹

County Ratio =

$$\frac{\text{County's Share of State Foreclosure Cases (2007 \& 2008)}}{\text{County's Share of State Housing Units (2008)}}$$

A ratio greater than 1.0 suggests that a county has a greater share of foreclosure cases relative to its share of housing units (i.e. disproportionately high). Conversely, a ratio less than 1.0 suggests that a county has a lower share of foreclosure cases relative to its share of housing units (i.e. disproportionately low).

1. Based on unique properties reported in the Consolidated Court Automation Programs case management system. Housing units are 2008 estimates from the Wisconsin Department of Administration. Data for Portage County is not currently available.
