

Wood Products Value-Added Manufacturing and Finishing: Efficiency, Waste Reduction and Regulations

Second Edition by Lauranne J. Bailey,
David S. Liebl, Eugene M. Wengert
University of Wisconsin - Extension
Solid and Hazardous Waste Education Center
May 1998

Forward

The Solid and Hazardous Waste Education Center (SHWEC) is pleased that you have obtained the guide to improve efficiency while reducing waste in your industry. The evidence supporting waste reduction and pollution prevention is overwhelming. Companies embracing these practices have seen substantial savings in operating costs, improved product quality, reduced risk to worker health and safety, and enhanced standing in their communities. We hope you take the time to carefully review the waste prevention opportunities outlined in this guide and apply them as appropriate to your operations.

The development of this manual is based on a cooperative effort by those listed below. Substantial modifications have been made to the manual to better serve Wisconsin manufacturers. The first edition of this manual was:

Produced by:

US Environmental Protection Agency
Center for Environmental Research Information
Cincinnati, Ohio

Tennessee Valley Authority
Waste Management
Knoxville, Tennessee

Prepared by:

Dolan-Friss Associates
Newtown, Connecticut

Preventive Environmental Management
Raleigh, North Carolina

Radian Corporation
Research Triangle Park, NC

Other sponsors:

Waste Reduction Resource Center
Raleigh, North Carolina

State of North Carolina - Office of Waste Reduction
Raleigh, North Carolina

American Furniture Manufacturers Association
High Point, North Carolina

State of North Carolina - Small Business Ombudsman Office
Raleigh, North Carolina

Southeast Manufacturing Technology Center
Columbia, South Carolina

Other Contributors:

Akzo Coatings Incorporated
High Point, NC

Bernhardt Furniture Company
Lenoir, NC

Century Furniture Industries
Hickory, NC

Furniture Manufacturing & Management Center
North Carolina State University
Raleigh, NC

Mid West Research Institute
Cary, NC

Pulaski Furniture Corporation
Martinsville, VA

Trip Sizemore & Associates
High Point, NC

Vaughan-Bassett Furniture
Galax, VA

Webb Furniture Enterprises, Inc.
Galax, VA

Wood Furniture Industry
Waste Reduction Opportunities

Second Edition Credits:

External Reviewers:

- C Eugene Wengert, Wood Processing Specialist, University of Wisconsin Cooperative Extension, Madison
- C John Healy, Executive Vice President, National Wooden Pallet & Container Association
- Laurel Sukup, Business Sector Specialist for the Wood Products Industry, Wisconsin Department of Natural Resources

Internal Reviews:

- David Liebl
- John Katers
- Jack Annis

Table of Contents

Section I:	Introduction	1-2
Section II:	Steps for Developing a Waste Reduction Program	1
Section III:	Saw Milling	1-7
	<i>Log Yard</i>	
	<i>Sawing</i>	
	<i>Edging & Trimming</i>	
	<i>Storage</i>	
	<i>Checklist</i>	
Section IV:	Lumber: Receiving, Drying, and Storage	1-15
	<i>Inspection and Sorting Lumber</i>	
	<i>Properly Align Kiln Sticks</i>	
	<i>Kiln Dry Lumber to Control Moisture Content</i>	
	<i>Improve Dry Kiln Boiler Efficiency</i>	
	<i>Improve Drying Kiln Efficiency</i>	
	<i>Improve Kiln Drying Efficiency with Variable Speed Fans</i>	
	<i>Dehumidification Drying</i>	
	<i>Maintain Adequate Relative Humidity Levels</i>	
	<i>Provide Adequate Dry Shed Capacity and Environment</i>	
	<i>Checklists</i>	
Section V:	Getting the Most Out of Your Wood	1-4
	<i>Remove Defects from Rough Lumber Efficiently</i>	
	<i>Finger Jointing</i>	
	<i>Recycle Wood Waste and Sawdust</i>	
	<i>Utilize Proper Gluing Techniques</i>	
Section VI:	Product Dimensioning	1-3
	<i>Machining</i>	
	<i>Dust Collection</i>	
	<i>Recycle Wood Waste and Sawdust (see section V)</i>	
	<i>Utilize Proper Gluing Techniques (see section V)</i>	
	<i>Checklist</i>	
Section VII:	Coating Your Finished Product	1-23
	<u>Coating Formulations:</u>	
	<i>Waterborne</i>	
	<i>High-Solids Solvent-Based</i>	
	<i>Polyester / Polyurethane-Based</i>	
	<i>Carbon Dioxide System</i>	
	<i>Radiant Cured</i>	
	<u>Coating Application Technology:</u>	
	<i>High Volume Low Pressure (HVL) Spray</i>	
	<i>Airless Spray</i>	
	<i>Air-Assisted Airless Spray</i>	
	<i>Electrostatic Technology</i>	
	<i>Vacuum Coating</i>	
	<i>Dip Coating</i>	
	<i>Flow Coating</i>	
	<i>Curtain Coating</i>	

	Roll Coating
	Dry Coating
<u>Cleaning/Stripping:</u>	Alternatives to Methylene Chloride
<u>Operation and Maintenance:</u>	Train Equipment Operators
	Prepare Coatings Properly
	Direct Delivery of Coating to Spray Gun
	Use Heat to Obtain Desired Coating Viscosity
	Spray Equipment Maintenance
	Equipment Cleaning and Line Flushing
	Inventory and Scheduling Management
	Reuse and Recycling of Finishing Materials
Checklists	

Section VIII: Storing and Shipping Your Products 1-6

	Enhance Packaging Performance by Evaluating Damage History
	Enhance Packaging Performance by Evaluating Relative Humidity
	Keep Relative Humidity Under Control
	Minimize Volume and Weight of Packaging Materials
	Benefit from Reusable Pallets and Containers
	Improve Compatibility of Packaging Materials for Recycling
	Recycle Other Wastes Produced in the Packaging, Shipping and Warehouse
	Web Links
	Checklist

Section IX: Ancillary Products 1-2

	Using Synthetic Lubricating Oils
	Recycle Oils
	Oil Spill Clean-Up with Recyclable Absorbents
	Keep Chemical Wastes Segregated
	Segregate and Recycle Plastic, Paper, Wood, Metals and Glass

Section X: Byproduct Utilization 1-18

	Fuel
	Pulp
	Composite Products
	Animal Bedding and Soil Amendment/Conditioner
	Animal Feed
	Packaging
	Specialty Products
	Checklist
	Sawdust/Shavings Uses

References 1-2

Appendix A Overall Environmental Regulations 1-6
Appendix B Equipment Vendors 1-12
Appendix C Publication Resources 1
Appendix D Glossary of Terms 1-4
Appendix E Wood Resource Contacts 1-3
Appendix F Other Checklists 1-14

Case Studies

<i>Haworth: Formaldehyde-free adhesive</i>	V-3
<i>Hussy Seating: Switch to PVA glues</i>	V-4
<i>New England Woodcraft: Water-based sealers/topcoats</i>	VII-1
<i>Madison Prehung Doors: Water-based finishes</i>	VII-2
<i>Shuttery of Nanik: Water-borne coatings</i>	VII-2
<i>Pennsylvania House: UNICARB spray lacquer</i>	VII-3
<i>Lowenstein: Epoxy acrylate UV sealer</i>	VII-4
<i>Ethan Allen, Inc.: HVLP equipment</i>	VII-6
<i>Tiz's Door Sales: HVLP equipment</i>	VII-6
<i>Henredon Furniture: HVLP equipment</i>	VII-7
<i>Thomson Crown: HVLP equipment</i>	VII-7
<i>Larson Juhl: Air Assisted Air Less Sprayers</i>	VII-8
<i>Thomasville Furniture: Airless electrostatic sprayers</i>	VII-8
<i>Sun Tui: Automated electrostatic spray</i>	VII-8
<i>Broyhill Furniture: Electrostatic system</i>	VII-9
<i>Steelcase: Flatline roller coating system</i>	VII-9
<i>Gerry Wood Products: Dry coating</i>	VII-11
<i>Larson Juhl: Runs closed-loop painting system</i>	VII-11
<i>Ethan Allen, Furniture: Training operator program</i>	VII-12
<i>Ethan Allen Furniture: Filters and packaging</i>	VII-13
<i>Ashley Furniture: Batch Solvent distiller</i>	VII-14
<i>Boling Company: Solvent distillation</i>	VII-15
<i>Medallion Kitchens: Sealer reclamation system</i>	VII-16
<i>Thomson Crown: Revised paint disposal system</i>	VII-16
<i>Ethan Allen Furniture: Solvent recovery</i>	VII-16
<i>Shelby Williams: Cardboard reuse</i>	VIII-5

Checklists

<i>Ideas for Increasing Sawmill Profitability Today</i>	III-6
<i>Quality Drying of Softwood Lumber</i>	IV-7
<i>Quality Drying of Hardwood Lumber</i>	IV-10
<i>Quality Drying in a Hardwood Lumber Predryer</i>	IV-14
<i>Reducing Waste and Improving Yields</i>	VI-3
<i>Using Tanks in Your Refinishing Shop</i>	VII-18
<i>Cut Costs Through Record Keeping</i>	VII-19
<i>Protect Your Health in the Refinishing Shop</i>	VII-20
<i>Refinishing Safety</i>	VII-21
<i>Application Equipment Requirement</i>	VII-22
<i>Work Practice Standard</i>	VII-23
<i>Storing and Shipping Wood Products</i>	VIII-6
<i>Byproduct Utilization</i>	X-6
<i>On-site Team Assessment Worksheet</i>	F-1
<i>Recordkeeping Requirements</i>	F-13
