

AGRONOMY FIELD DAY

Tuesday, August 30
Montsma and Boelk Farms
Hwy. 151 and Co. Rd. TC, Lamartine
10:30 a.m. - 2:30 p.m.

Field Day Highlights:

- Corn Hybrid and Soybean Variety Plots
- Herbicide Field Plots

Corn Silage Moisture Testing: The Fond du Lac Co. Forage Council will have their silage chopper on-site for whole plant moisture determination. Bring along 4 stalks from a silage field (CUT FRESH!). **Please have the following information with each sample: name, address, phone, E-mail or fax (if available), hybrid, and planting date. Samples must be on site by noon.**

PROGRAM

Session A: Pest Control - offered at 10:45 am and 12:30 pm

1. Effectiveness of Seed Treatment Aphid Control – Eileen Cullen, UW-Extension Entomologist
2. What Herbicide Programs Worked Best in 2005? - Chris Boerboom, UW-Extension Weed Specialist
3. Pest Management Observations from 2005 – AgriLand Co-op Agronomists
