

Agronomy Field Day

Tuesday, August 28
Montsma Farm
Hwy. 151 and Co. Rd. TC, Lamartine
10:30 a.m. - 2:30 p.m.

Field Day Highlights:

Corn Hybrid /Soybean Variety Plots

Herbicide Field Plots

Corn Silage Moisture Testing: The Fond du Lac Co. Forage Council will have their silage chopper on-site for whole plant moisture determination. Bring along 4 stalks from a silage field (CUT FRESH!). Please have the following information with each sample: name, town, phone, E-mail or fax (if available), hybrid, relative maturity, and planting date. Samples must be on site by noon.

PROGRAM

Session A: Pest Control - offered at 10:45 am and 12:30 pm

1. Corn and Weeds: a risky business - *Chris Boerboom, UW-Extension Weed Specialist*
2. Does it pay to spray for late season corn diseases? – *Brian Madigan, AgriLand Co-op Agronomist*
3. Overview of Herbicide Plots - *Jeff Laufenberg, DuPont*

Session B: Crop Management - offered at 10:45 am and 12:30 pm
