

Iowa - Staff assessment of test kits
End of Training

Please rank the test methods from 1-4 relating to the ease of training and volunteers' use of the various testing methods, with 1 next to the method that is easiest to learn, to train volunteers, or in which volunteers have the most confidence.

	Coliscan® Easy Gel method (not incubated).	Coliscan® Easy Gel method (incubated).	3M™ Petrifilm™ method	Colisure® method with the IDEXX Quanti-Tray/2000™
Ease in training				
Ease for volunteers to learn				
Level of Volunteers' confidence in using				

Please identify any difficulties you faced while training volunteers in the use of each method.
