

FBI Cyber Safety Tips

There are some very important things that you need to keep in mind when you're on your computer at home, at school, or anywhere!

- 1. First, remember never to give out personal information such as your name, home address, school name, phone number or photo online.**
- 2. Never write to someone who makes you feel uncomfortable or scared, even if you know who they are.**
- 3. Do not meet someone or have them visit you without your parent's permission.**
- 4. Tell your parents right away if you read or see anything on the Internet that makes you feel uncomfortable.**
- 5. Remember that people online may not be who they say they are. Someone who says that "she" is a "12-year-old girl" in the cyberworld could really be an older man in the real world.**
