What You Need to Know
& Favorite Recipes

Breads make any meal more satisfying!

There are many kinds of bread.
Use them to add variety to your meals.

MyPyramid Helps Build a Healthy Diet

Make Half Your Grains Whole

- 6 ounces of grains are recommended each day. Eat at least 3 ounces of **whole grain** cereals, breads, crackers, rice, or pasta every day.
- One ounce is about 1 slice of bread, 1 cup of breakfast cereal, or 1/2 cup of cooked rice or pasta.
- To find whole grains, look on the label to see that grains such as wheat, rice, oats, or corn are referred to as "whole" in the list of ingredients.

Isn't bread fattening?

No, but toppings add extra calories. Go easy on high fat spreads such as margarine and butter.

Creative Uses for Bread

- Toast bread for breakfast or snacks. Top with fat-free spread: jams, applesauce, or fresh fruit slices.

- Make French toast or bread pudding.

- Make croutons to garnish salads and soups, or to use in your favorite stuffing recipe.
- Use bread crumbs:
 - in meat loaf, meatballs, and patties.
 - to coat chicken, fish or pork chops before baking.
 - for a topping on casseroles.

Making Croutons

1. Preheat oven to 350°.
2. Use slices of whole grain or white bread. Cut into 1/2 to 1-inch cubes.
3. Arrange cubes in a shallow baking pan.
4. Bake until golden brown - about 20 minutes - stirring occasionally.
5. Cool and store in an airtight container.

Making Bread Crumbs

1. Save slices of dry bread in the freezer.
2. When you need bread crumbs, grate frozen slices of bread by hand or use a blender.
3. Store in tightly closed bag or container in freezer.
