

JUNEAU COUNTY MASTER GARDENERS ✨

NEWSLETTER

July 2008

UW-Extension Juneau County

HAPPY BIRTHDAY AMERICA

JULY MASTER GARDENER MEETING

WHEN: Monday July 28, 2008
6:30 – 8:30 pm

WHERE: Maureen Fox
W10508 County Hwy S
Elroy WI 53929
608 462-4228

Car pool when you can
Bring along lawn or folding chair

DIRECTIONS:

From Mauston:

- Take Hwy 82 to Elroy
- Turn right on Hwy 80 (north towards New Lisbon)
- Go north 1.8 miles to Hwy H
- Turn left on H and continue 4.1 miles to Hwy S
- Turn right on S, 1st house (cedar siding) on left (1/3 mile)
- Look for balloons on Tree Farm sign

From Elroy:

- North on Hwy 80, follow direction from Mauston

From New Lisbon:

- Take Hwy A west out of New Lisbon to Hustler
- At west end of Hustler turn left onto Hwy H
- Proceed on H 4.1 miles to Hwy S (top of long uphill)
- Turn left on S, 1st house (cedar siding) on left (1/3 mile)

AGENDA:

- Meet and Greet
- Plant Sale
- Garden Tour
- Magazine and Catalog Swap
- Approval of June 23 Minutes
- Treasurer's Report
- Audit Report

UNFINISHED BUSINESS:

- MG signs
- Projects for 2008
 - Boorman House
 - Chamber of Commerce – Mauston
 - Visitors Bureau - Mauston
 - Juneau County Fair
 - Mauston Hospital Project
 - Prairie Flower Restoration at Buckhorn State Park

UPCOMING EVENTS:

- July 16-19, 2008 – Midwest Regional MG Conference: *Gardening Through the Continuum of Life* - Milwaukee, WI
- August 13-17, 2008 – Juneau County Fair

Juneau County Master Gardener Meeting Minutes
June 23, 2008 6:30 pm - Sue Rattunde Residence
Secretary: Rich Milgrom

Meet and Greet

Magazine and catalog swap

Meeting was brought to order by Acting President Sally Spangler.

Approval of May 19th meeting minutes

A Big Thank You to Sue for the tour of the fountain, garden and tree house areas, and for all the great food. It was also a real treat to see a one of a kind petunia tree.

There were 34 people in attendance and we have 50 total members.

Treasurer's Report - Previous Balance: \$ 1892.78

Expenses: \$52.75 flowers for Boorman House (reimbursable),
\$55.00 for fair booth.

Total Expenses: \$107.75

Income: \$24.00 - 2 memberships, \$6.00 name tag

Total Income: \$30.00

Current Balance: \$ 1815.03

Correspondence:

❖ Irene K. received a thank you certificate for her participation in Univ. of Wisc. Extension seed testing. She will make a list of the varieties used in the trials available at the extension office.

Membership Chair Update - Jan Brendle - We have 50 members, 37 certified.

Historian Report - Nothing to report

Unfinished Business:

❖ 2009 WIMGA Conference (October 2-3, 2009) Update - Rich/Arris

The front of the quilt being made for our raffle was presented at the meeting. It has 16 blocks depicting fruits and vegetables grown around Wisconsin. Border is green and the accent label will be either red or orange. The machine quilter will charge \$70 probably using a vine design and with the material the cost is currently \$195.50. It will be filled with a new fiber made with 80% corn and 20% polyester. The back of the quilt will be blue/green and the upper corner will be out logo *GARDINING IS A GAMBLE* and on the lower corner *BUT WORTH IT*.

Molly Jahn, Dean of Agriculture and Life Science has agreed to speak, possibly at luncheon on Saturday. The topic is to include volunteerism and a subject that covers Wisconsin climates.

Speakers' fees will be \$2000 and we expect 15 speakers.

Rich is working with his son, a sign designer, and will have a completed draft by the next meeting. It will be crescent shaped with our logos and the deck of cards in the center (with red and black color scheme). The bottom will be "Wisconsin Master Gardener Association 2009".

Decision was made to skip the tours and give out brochures with points of interest. Ho-Chunk runs shuttles to the Crane Foundation and the Dells several times a day.

For raffles and silent auction we will get donations such as quilt, wreath from Columbia County, sculpture by Ellis Nelson valued at \$240 and a stained glass piece.

There will be handout bags with brochure, pen and sticky notes from the Dells, tourist info from Baraboo, and possible other donations from other companies like Osmocote.

The contract has been signed with the Ho-Chunk Convention Center.

New Business:

❖ Update Bylaws -

Officers:

The immediate past president shall serve as an advisory to the president and the board.

Nominations:

After elections, a nominating committee shall consist of three members of the JCMGV's and one will be appointed chairperson right after the June meeting. The committee will nominate and present officers (for positions that are up for election) at the June meeting. The positions are Vice President and Secretary in even years and the President and Treasurer in odd years.

Jan Brendle has agreed to be chairperson. Irene Klingemann made a motion to adopt the new by-laws and it was seconded by Irene Boudreau. Motion passed unanimously.

- ❖ MG signs - Suggested by Rosemary Aney that we place plaques at projects done by JCMG's. We will order 6 giving us 2 extra. Arris is checking into purchase.
- ❖ Election of Officers - Vice President and Secretary
Arris nominated Maureen Fox for Vice President and Jan nominated Rich Milgrom for secretary. Both were voted on and approved.

Projects for 2008:

- ❖ Boorman House - Flowers done in the front. Looking for help from the membership to work shade garden or other areas. Some people have volunteered to help. Need to follow current design using existing bricks.
- ❖ Mauston Chamber of Commerce and Visitors Bureau - Sally has called Barb Baker - no response, yet.
- ❖ Juneau County Fair - Booth fee has been fully paid (\$55). Fair is August 13th to the 17th. Need plants to sell at the fair. Start potting now. Sign-up sheet will be available at the next meeting.
- ❖ Moose Lodge - Replanted perennials to sunny location.
- ❖ Mauston Hospital Project - Weeded and removed excess ground cover last Wednesday. Planted a flowering crabapple, moved hostas from sunny to shady areas. Peat moss will available in a week or so and needs to be added to soil. Meeting this Wednesday at 4 pm to weed, plant perennials and till the soil.
- ❖ Prairie Flower Restoration at Buckhorn State Park - Need to talk to Joe. Rich Mazzoni volunteered to call Joe.
- ❖ Marsha Lubinski stated that the planting at the American Legion is a non-issue. They will handle it themselves.
- ❖ Thank you from Jan for plant sale. Raised \$616 for Carl T. Nelson Animal Shelter.
- ❖ Rosemary Aney had hand outs for preprinted plant markers that don't fade in the sun. You could also get plain one with no fade marker to make your own. Available at www.plantid.com

Garden Meeting Dates and Locations:

Please call and confirm any events before attending as there may be a change.

July 28th - Maureen Fox

August 25th - Gail Hitchcock

September 22nd - Sally Spangler

October 27th - Library

Events/Important Dates:

- ❖ July - Audit of books
- ❖ July 16-19 - 2008 Midwestern Regional Conference - Milwaukee
- ❖ See State MG Website for more events <http://www.hort.wisc.edu/mastergardener/>

Note from Gypsy

Dear Friends

I looked out my bedroom window this morning and "lo and behold" I saw hollyhocks blooming. They fought themselves to grow taller than my weeds and grass that is in all my flower beds. This proved to me that Mother Nature is stronger than me. I am so far behind I may never catch up by winter! The vegetables garden has priority. Who wants to buy veggies from the grocery store? NOT ME!!

On the bright side, my friend, Ardie, was visiting from Tennessee and she thinks my "ornamental grass" looks great.

Until next time,

GYPHY
aka Jean Morton

Craig's Corner

Agriculture Agent 608-847-9329
Juneau County UW-Extension

Ever wonder what people are asking (or sharing with) the Juneau County Extension Agricultural Agent? Below is a sample of the latest horticultural related issues. Have a question or comment just call 608-847-9329 or email craig.saxe@ces.uwex.edu Extension publications mentioned can be found at: <http://learningstore.uwex.edu/>

- **Fire blight** is the most destructive bacterial disease affecting plants in the rose family, including apple, pear, crabapple, mountain ash, rose and spirea. Blossoms, leaves, twigs and branches of plants affected by fire blight can turn dark brown to black giving the appearance of having been scorched in a fire. Twigs often wilt and bend approximately 180° forming a "shepherd's crook". Unfortunately, there is no cure for fire blight, but its spread can be limited by carefully pruning out diseased branches. Remember to disinfect pruning tools after each cut. By far the most effective control strategy is to choose plants with resistance to fire blight. For more information, see publication A1616 "Apple, Pear, And Other Related Trees Disorder; Fire Blight".
- Sometimes **tree care** requires a professional's knowledge and experience. That's when it's time to consider contacting a professional arborist. To find an arborist, I recommend going to the Wisconsin Arborist Association web site at: <http://www.waa-isa.org/>. At this web site you'll find a directory of certified arborist for hire and a tool to help narrow down your search. Unfortunately, the directory doesn't list anyone actually living in Juneau County at this time, so be prepared to pay for time and mileage.
- **Gypsy Moth** is becoming a major tree pest in Juneau County, but one of the benefits of the heavy rains in June is that it promoted a moderate outbreak of the Entomophaga pathogen. This fungus disease needs high humidity. If conditions are ideal, hundreds of dead gypsy moth larva can be found on tree trunks with very little defoliation found on the tree. Fungus killed larva die in a vertical position. Spores will be released to hopefully infect next year's larva.
- Because of recent flooding, questions have risen about the safety of consuming produce from gardens that were under water. Concern about using garden produce after a flood depends on whether the flood water was "clean", or may have been contaminated with sewage, farm run-off, or industrial pollutants. The most conservative answer is that you discard all produce that was covered by contaminated flood water. Safety specialists have provided tips for considering what can be salvaged and what must be discarded. You can find those tips at: (and also reprinted with permission on pages 5 & 6) <http://dodge.uwex.edu/documents/SafetyofProducefromFloodedGardens08.pdf>. Thanks to Kathy Metzenbauer for researching this.
- **Tick Warning** - Lyme disease and Ehrlichiosis – According to a local physician in the Eau Claire area, the incidence of both Lyme disease and Erhichiosis are up this year. So when you come back in from the field or any outdoor activities: do a thorough tick check. Believe me, you do not want to be put on the antibiotic.

Safety of Produce from Flooded Gardens (June 2008)

As a result of recent flooding, questions have been raised about the safety of consuming produce from gardens that were under water for a day or two. How concerned you have to be about using garden produce after a flood depends, to a large degree, on how "clean" the flood water was or whether it was likely to have been contaminated with sewage, river or creek water, farm run-off, or industrial pollutants.

The most conservative answer — one that eliminates any and all risks — is that you discard all produce that was touched by flood water. However, with weeks left in the growing season, you may wish to salvage some crops. Here are tips for considering what can be salvaged and what must be discarded from your flooded garden.

Produce can be **cooked** to ensure safety, and this is the best choice if anything that was touched by flood water will be served to those most at risk for serious consequences from foodborne illness: young children, the elderly, pregnant women and those with compromised immune systems.

For produce to be consumed uncooked (raw), begin by **discarding** all **leafy vegetables** such as lettuce or spinach — regardless of how mature the plants are. It's not possible to scrub these crops as they have many ridges and crevices that could contain contaminated silt or bacteria. All **soft fruits** that are **ready to harvest** such as strawberries or raspberries, must be cooked; they too are impossible to thoroughly clean and **can not** be safely consumed raw.

Other produce may be salvaged depending on the crop and how far along it is in the growing season. In general, any produce for which the edible part was directly touched by flood water presents a potential risk to health if consumed. This includes produce that was submerged or splashed by flood water. The ability to salvage crops that will be eaten raw with minimal risk depends on the source of the flood water, time to harvest, and whether potential contamination will have been internalized into the plant tissue.

One starting point for evaluating the safety of produce from flooded gardens is the National Organic Program (NOP) guidance to farmers wishing to harvest produce from soil fertilized with non-composted manure. The NOP requires a 90-day period before harvesting edible material from plants grown in soil fertilized with non-composted manure — the manure can not have touched the edible material. NOP standards require a 120-day period before harvest of edible plant material with direct contact with non-composted manure. Research suggests that contamination from non-composted manure should present a more significant health risk than contamination from flood waters.

Early season crops that will be harvested within the next few weeks and that remained above flood waters should **be safe if cooked or peeled**. Examine any produce carefully before harvest. If it is soft or cracked, bruised, or has open fissures where contamination might have entered, throw it out. Begin by rinsing produce with clear tap water (do not use soap) followed by a brief soak (2 minutes) in a weak chlorine solution of 2 Tablespoons bleach to a gallon of water. Rinse in cool, clean tap water. Peel or

cook thoroughly before eating. Take care to prevent cross contamination in the kitchen. Change the bleach solution if you notice the water is no longer clean.

Plants where fruits have set (tomatoes) or where flowers are evident (broccoli/cauliflower) present an undefined risk. Before consuming these crops raw, consider the source of the flood water, the time since contamination, and the health of the tissue. Always discard any tissue that is bruised, cracked or otherwise blemished. Washing fresh produce with clear water, followed by a brief soak in a dilute bleach solution (see above) and then rinsing before eating or peeling will help to reduce any remaining risk.

Underground vegetables such as beets, carrots and potatoes that are still early in the growing season should be safe if allowed to grow to maturity (4 - 8 more weeks). Root crops that will be consumed within the month (i.e. new potatoes) should be washed in water, rinsed and sanitized as directed above before cooking thoroughly. Note: beets may be peeled after cooking, if desired.

Melons and other fruits which will be eaten raw **should not be consumed**. Recent foodborne illness outbreaks linked to melons suggest that these low - acid fruits may not be safe even if surface - sanitized.

Late - season vegetables that result from flowers produced on growth that develops after flood waters subside should be safe. To increase safety, cook them thoroughly, or at least wash them well and peel them, if possible, before eating. This could include tomatoes, peppers, eggplants, squash, cucumbers, and similar vegetables.

Flood - damaged garden produce that is otherwise unfit for eating **should not be canned** or otherwise preserved. Garden produce that **would** be safe to consume after washing, sanitizing and cooking may be safely canned. Because the low temperature of home dehydrators do not destroy high numbers of bacteria, **do not attempt** to dehydrate produce from flooded gardens.

Never sell produce from a flood - damaged garden at a farm market or farm stand until you are sure that all contamination has been removed from the garden, usually a period of at least one month after the last incidence of flooding. Check with the Division of Food Safety of the Department of Agriculture, Trade, and Consumer Protection (608) 224 - 4665 if you have questions about market sales of garden - flooded produce.

CALENDAR OF EVENTS

NOTE: Be sure to call & check times & dates to verify event.

July 21, 2008 - Vegetables: The New and The Old - West Madison Ag Research Station, Verona, WI - Join Karen Delahaut, Extension Vegetable Specialist, at 6:00 p.m. to learn about some modern and heirloom cultivars of vegetables that are being grown in the garden. Free. For more information contact Asst. Superintendent Judy Reith-Rozelle, 8502 Mineral Point Rd, Verona, WI 53593-9689 at (608) 262-2257 or fax (608) 829-307.

July 24, 2008 - Twilight Tour - Rotary Botanical Gardens, Janesville, WI - Free educational tours of grounds. For more information call Rotary Botanical Gardens at (608) 752-3885.

July 25, 2008 (12:00 noon) - Youth Horticulture Web Site - Brown Bag Program - contact UW Ext Office for access. - Join Mike Maddox to learn more about a new website that will be a clearinghouse of information for those offering horticulture education to children.

July 31 - Aug 10, 2008 - Wisconsin State Fair - West Allis, WI - Cows, cream puffs, amusement park rides, and many horticultural exhibits and programs, including SEW MGA displays. See the State Fair website for details at <http://www.wsfps.state.wi.us/home/wsfps/>

Aug 5, 2008 - Fruit, Vegetable and Flower Twilight Tour - Hancock Ag Research Station, Hancock, WI - Hosted in the Albert Horticultural Garden from 4:00 to 8:00 p.m. Tour the station and research plots, and see more than 600 varieties of perennials, herbs, prairie plants, shade plants, grapes and heirloom varieties. For more information contact the Hancock Ag Research Station, N3909 County Hwy V, Hancock, WI 54943-7547 at (715) 249-5961 or fax (715) 249-5850

Aug 12, 2008 - Fruit Walk: Grapes, Raspberries, Blueberries, Apples, Strawberries, and All Those Little Unknown Fruits - West Madison Ag Research Station, Verona, WI - Join Bob Tomesh, Extension Horticulture Specialist, at 6:00 p.m. to learn about the various fruits being grown in the garden. Free. For more information contact Asst. Superintendent Judy Reith-Rozelle, 8502 Mineral Point Rd, Verona, WI 53593-9689 at (608) 262-2257 or fax (608) 829-3074

Aug 14, 2008 - Herbal Teas - Rotary Botanical Gardens, Janesville, WI - Hosted by the Janesville Area Herb Society, beginning at 7:00 p.m. \$5 donation. For more information call Rotary Botanical Gardens at call (608) 752-3885.

Aug 16, 2008 - Urban Horticulture Field Day - West Madison Ag Research Station, Verona, WI - Tours, vegetable sampling and demonstrations on a variety of topics from 10:00 a.m. to 3:00 p.m. Free. For more information contact Asst. Superintendent Judy Reith-Rozelle, 8502 Mineral Point Rd, Verona, WI 53593-9689 at (608) 262-2257 or fax (608) 829-3074

Aug 22, 2008 (12:00 noon) - Growing Tender Bulbs: Glad, Carna, Dahlia - Brown Bag Program - contact UW Ext. Office for access. - Join Bob Tomesh to learn more about growing and storing these wonderful additions to the summer garden.

Aug 22-23, 2008 - Explore the World of Perennial Gardening - Madison, WI - Presented by the Central Region of the Perennial Plant Association, this two-day "mini" symposium offers great opportunities to learn from the experts, as well as visit some local public and private gardens and businesses. At Madison Marriott West, 1313 John Q. Hammans Drive, Madison. \$175, includes Friday lectures, Saturday tour, lunches on both days and refreshment breaks. Single day registration available. For more information contact the Perennial Plant Association at ppa@perennialplant.org or (614) 771-8431.

An EEO/Affirmative Action employer, University of Wisconsin-Extension provides equal Opportunities in employment and programming, including Title IX and ADA requirements.

AFTERNOONS ON THE LAKE

by Lincoln Hartford

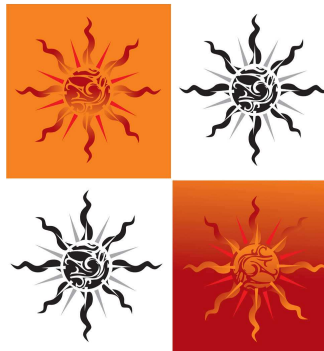

We push the breathless lake around.
Mammoth loud-mouthed boats,
squealing children, splashing dogs
whooping after the stick
fleshy parents standing guard
armed with gossip

under a sea-sky of cumulus clouds,
climbing, mounting each other,
while Father Sun shouts
what everyone knows,
“I’m in charge here.”

On the quiet front
of the eastern shore
patient cottonwoods
arch over rippling water
clinging to rocks and sand.

They all wait
until the sky master
drops over the edge. Then the great lady
will seek her common level, and rest,
not caring if we love or die.
All the attendant community
will continue to call her
“home”.
