

County Cost Share Grant Monies Available for 2009

Oneida County Land and Water Conservation Department is looking for riparian landowners that are interested in restoring their shoreline buffers or preventing sediment loss due to shoreline erosion. County Cost Share monies are available in 2009 for eligible projects.

Tired of mowing and fertilizing your lawn? Concerned over the use of pesticides? Problems with geese on your lawn? How about restoring your lawn to a natural state? No need for mowing, fertilizing or pesticide use. See and enjoy butterflies, dragonflies, birds, frogs, and other beneficial wildlife. Enjoy color, texture, and depth with a restored shoreline. All this plus knowing that rainwater runoff will be that much cleaner once it intersects the lake.

Is your shoreline showing signs of erosion and sediment loss? Whether it is caused by storm water runoff or wave energy from the lake, we may be able to assist technically and/or financially. There are many ways to help stop shoreline erosion. Let us take a look and evaluate your shoreline to determine if it is eligible for the County Cost Share Program.

Water quality....lets keep it!!
