THE UNIVERSITY OF WISCONSIN-EXTENSION,  
SHEBOYGAN COUNTY OFFICE  
A VALUABLE RESOURCE FOR THE CITIZENS OF  
SHEBOYGAN COUNTY

Our Mission: Helping the people of Wisconsin and Sheboygan County apply university research, knowledge, and resources to meet their educational needs wherever they live and work.

We are unique. Our connections to the University of Wisconsin and United States Department of Agriculture, as well as other state and federal resources result in unique programs and services to our citizens. We can draw from the expertise of 245 state specialists on eight University of Wisconsin campuses.

We are responsive. Our programs and materials are designed to meet local needs. We consistently conduct assessments of our citizens’ educational needs and evaluate programs and materials to ensure the needs are being met.

We are truly county-wide. Our staff diligently implement our mission of meeting our citizens educational needs wherever they live and work, be it an urban, suburban, or rural setting.

We are unbiased. Regardless of the issue, our staff provides factual, unbiased programs and information so our citizens can make well-informed decisions.

We maximize our resources. We regularly “train the trainer” to enhance our ability to reach more of our citizens.

We mobilize volunteers. The hundreds of citizens that volunteer every year to assist our staff in program delivery builds leadership and ownership and provide a mechanism for program feedback and quality enhancement.
