

State Your Opinion

This activity helps participants identify their feelings regarding financial issues and can be used with various financial education subjects.

Will need tape, signs for each of the following words- AGREE, DISAGREE, and MAYBE, list of statements related to the subject being taught.

Choose four or five statements. Poster the three signs in different areas around the room.

Ask participants to stand up and look around the room for the three signs. Explain that you will be reading a series of statement (one at a time). After listening to the statement, each participant should move to the sign that best describes his/her opinion about that statement. After participants move, ask for two or three volunteers from each opinion group to share why they feel the way they do.
