## Keeping Your Food Safe

Bacteria can grow in foods at room temperature and some can make you sick.

### Remember:

- Thaw chicken in the refrigerator, or use microwave oven to thaw. Never on the counter.
- Cook chicken meat until well done, 180°F. When poked with a fork the juice looks clear, not pink.
- After cutting up raw chicken, clean the cutting board with warm soapy water. Rinse and sanitize with a dilute bleach solution, 1 teaspoon of bleach in 4 cups of water.
- Refrigerate cooked chicken until ready to use.
