

Connect With ICS

Located in The Pyle Center, UW-Extension's conference and distance education center in Madison, Wisconsin, ICS is perfectly situated to accommodate your distance learning and telecommunications needs. The Pyle Center's exceptional meeting space and leading-edge technology offer you the flexibility to provide the perfect learning environment for your participants – wherever they are located.

Whether you need to communicate with a colleague across town or across the country, Instructional Communications Systems (ICS) can connect you. From audioconferencing to videoconferencing and webconferencing, we have the technology and the experience to meet your distance learning and telecommunications needs.

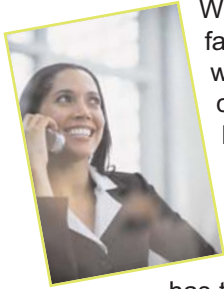

Our interactive technology services provide two-way, real-time communications. You can talk to the participants in your meeting, conference, or class and get their feedback during the event. Discussion is live and fully interactive.

Before, during, and after your conference or meeting, we're here to support you. We understand the unique needs of our governmental, educational, and non-profit colleagues, and provide the training you need to be successful.

ICS has been a leader in instructional teleconference services since 1965. Our experienced staff is ready to serve you, and is committed to continue to offer high-quality, innovative services to meet the needs of today's learners.

Audioconferencing

WisLine is the easy, fast and affordable way to meet with your colleagues without leaving your office or building. The WisLine audioconferencing service, operated by ICS,

has the features and capacity to serve your conference call needs. Features include dialin, dialout, and toll-free access; toll-free helpline; international connections; interconnections with videoconferences; and high-quality, digital audio. Conferences can be recorded to CD or cassette tape, or streamed live or archived for later replay on the web.

Webconferencing

WisLine Web combines the ease of a WisLine audioconference with the power of visually interactive web-based materials.

Webconferencing allows you to effectively communicate and collaborate in real-time on the Internet.

With WisLine Web you can conduct live, interactive meetings, courses, and programs using a web browser and a phone.

Videoconferencing

Videoconferencing makes your meetings come alive by bringing your associates into your meeting room. You can see, hear and converse with others located hundreds or even thousands of miles away.

Interactive videoconferencing transmits two-way interactive video and audio simultaneously between two sites or multiple sites. With the multi-point bridging system operated by ICS, more than thirty sites can be connected simultaneously in any combination of ISDN (H.320) or Internet (H.323) connections.

Webcasting

ICS Webcast is a fully integrated system that allows the capture and recording of audio, video and data, such as PowerPoint slides, in one streamed media presentation. It automatically syncs a speaker's video with the delivery of his or her support data -- such as graphics, slides, videotapes or DVDs -- into one single, seamless presentation.

Phone: 608-262-3772

Digital Media Services

The ICS Multimedia Services production staff takes the hassle out of digital or analog recording, mixing, editing, and duplicating for you. MMS produces CDs and DVDs, streamed media

(audio-video-data) presentations, and can re-purpose your old media into digital formats.

We can produce your multimedia project from start to finish -- from production and media duplication to printing labels and packaging your product. We can even assist you with distribution and media fulfillment.

Web Site Development

The ICS Web Team provides web site design and database design

services. The Web Team designs, develops and constructs relational and object-oriented databases for a multitude of data storage needs. Databases are programmed in a number of environments including Oracle, MS Access, SQL Server and FoxPro. ICS also provides other related services, such as data analysis and conversion, import and export of data between databases, or project consultation.
