

Wisconsin Barn Raising Project

Photographed and Submitted by: Chelcie L. Puetz

Location: On 190th Avenue just south of 40th
(Chippewa County)

I like the layout of the barn's scenery. The barn in the back with the house in front of it, and little white fences with sheep grazing in them. It's a perfect little sheep farm.

The barn has a gray shingled roof. It has white wood side, and it also has a stone bottom. Its roof is dome shaped. It is currently being used for raising sheep and one donkey. It is currently snowing in this picture.
