

Wisconsin Barn Raising Project

Photographed and Submitted by: Trudy Martin

Location: Highway 171 and County H, 40285 State Highway 171, Soldiers Grove, WI (Crawford County)

Constructed in 1907. Approximately 33' W x 50' L, not including lean-to.

[I like this barn because of its] post and beam construction and unique shaft for loading hay.

Was mostly used as a dairy barn. Stanchions still present—local limestone foundation and, most likely, local timber—unused at present.
