Dear colleagues,

## **IDF MILKING MACHINE INFORMATION - 7TH MAILING 2001**

Hello again!

### **Proceedings from workshop performance requirements and testing AMS**

As mentioned in our last mail we expected a summary from the Tjänikon workshop 13 June 2001 on robotic milking. By a separate document we now have the pleasure to send you the "Proceedings from Workshop on Performance Requirements and Testing of Automatic Milking Systems", prepared by Ole Lind, DeLaval, Sweden.

### **ISO standards for milking machines**

It now seems clear that an ISO group will be established to work out a proposal for an ISO standard on Automatic Milking Systems. The proposed Swedish secretary Rolf Thesslin expect to call for the first meeting ultimo February 2002.

So far no voting results from ISO/TC 123 concerning revision of ISO standards 3918, 5707 and 6690 are known. The ISO secretariat has advised the TC 123 members to vote for starting the revision, and if yes, the revision work is expected to be covered/administrated by the above mentioned ISO group.

We will inform you as soon as we know anything more.

Best wishes,

Terje Alfnes
